Mini Ball Valve**

Mini ball valves are suitable to use in small, confined spaces, where larger valves are not necessary. It is a quarter turn ball valve where the handle can be pivoted 90 degrees for open position or close position. They are usually installed for residential and light commercial applications in domestic hot and cold water systems, natural or bottled gas and compressed air systems.

It is a reduced bore type ball valve with one end male thread and one end female thread. The threaded end can be available in BSPP or NPT thread. The available material is stainless steel SS316 material which have better corrosion resistance.
